Dear henry oxley, please contact us at: sales@jet-hot.com or 1-800-432-3379 if you have any questions.

Thanks for choosing Jet-Hot! If you selected shipping insurance for your return shipping, you must be available to sign for the package when it is delivered. This quote is based on the information received. Pricing is not guaranteed until parts arrive and are inspected by Jet-Hot. All parts must be completely disassembled for proper coating and warranty eligibility, therefore all parts must be separated prior to arriving at Jet-Hot. Assembled components received are subject to pricing adjustments, disassembly fees, and order delays. Jet-Hot is not liable for damages to parts resulting from the disassembly, metal repair, or transit. Parts received with existing chrome or ceramic/metallic coatings are subject to additional strip fees. Parts received with any type of brazing (repairs or construction) are not recommended for high temp applications due to reduced coating adhesion at elevated temps and are therefore not eligible for the lifetime warranty. *Note this quote includes reduced return shipping costs and insurance. If you opt to use our UPS service for inbound shipping, your salesperson will add the reduced shipping and insurance costs to the final estimate/bill.
